Image: Paramount Pictures Movies and songs often go hand in hand. The soundtrack of a film is the musical equivalent of its themes. When you remember a favorite movie, chances are remembered the sound(s) you heard in it. Some songs are so inextricably tied to a film that immediately evokes a plot, scene or image. Manufacturers put a lot of thought into sound columns for a good reason. The song is what binds long after the roll of credits and will let you sing as you remember the movie. If you saw the movie, you'll probably remember the song, and if you heard the song, you'll probably remember the movie. Sometimes you can also feel that you have seen the movie from the theme song. Let's take Bond movies, for example. Their theme songs promptly evoke the feeling and tone of that particular film. The song highlights the concepts of the film and what it intends to convey. Call him a symbiotic report if you want to. With this in mind, we compiled a list of songs that have a famous movie attached to it. How many of these can be identified? Take this quiz and find out how many movies you can only remember from the titles of their songs! Then prove your friends' knowledge of the same titles. It's sure it's fun for everyone. What are you waiting for? Move! How much do you know about dinosaurs? What is an octane rating? And how do you use a noun? Luckily, HowStuffWorks Play is here to help. Our award-winning site offers reliable and easy-to-understand explanations on how the world works. From fun quizzes that bring joy to your day, to photography and fascinating lists, HowStuffWorks Play offers something for everyone. Sometimes we explain how the stuff works, sometimes, we ask you, but we're always exploring in the name of fun! Why learning is fun, so stay with us! Some streaming services havefor years without the option of downloading shows and movies for offline viewing, but that feature was available on Day 1 on Disney+. There are more than 600 titles in which to dive, enough to bin hundreds of hours of the Simpsons without even looking at a fifth of what is available. Perfect for air travel and frugal data spender, the service download function — which is exclusive to mobile applications like this writing — it is so simple also Olaf could use it, and with every appropriate title, it is just a matter of understanding what you want. Here, we will take you through the process of downloading and deleting movies and shows from your Disney+ app. Download movies and shows on Disney+ Step 1: Select the download quality Before enjoying it, let's talk about file formats. If you are suffering from storage space on your iPhone or Android smartphone, Disney+ includes a variable quality feature that allows you to sacrifice visual fidelity for a lower fingerprint. Open the Disney+ app on your smartphone (iOS, Android) and click on the icon of your profile on the bottom right. From there, navigate to Settings App > Download Quality. You will see options for standard, medium and high, the latter probably does not offer more than 1080p resolution. Step 2: Download the content As you can view any Disney+ title offline, no make-up or filter is required to find downloadable content. The most difficult part of this particular task is to understand what you want to look at. Once you realize that out, all you have to do from the movie or the show list is tap the download button, which is located far right of the Play button under the title logo. For shows, you can also find a separate download button next to each episode if you do not want the entire season. Disney takes care of magic from there. It's a downloadfast on Wi-Fi, especially at the lowest quality, so you can probably tear dozens of movies in thosehours before the flight, if you forgot to do it the night before. Step 3: Watch your movies and shows downloaded All you have to do now is have fun! A simple way to find your downloads is by hitting the download icon, which is always visible at the bottom right of the Disney+ app. All your content will be listed here, sorted by when you downloaded. Tap the game button on the thumbnail of anything you want to watch, and out you go. The episodes are listed a bit differently — they are nested under a single label, and touching it will present all the episodes you downloaded for that program, grouped by season. You can also find these titles through regular search and navigation. You will know that something is available for offline viewing if you see a smartphone icon where the download button usually sits. How much space do I need? The amount of storage space that each title eats is based mainly on length and video resolution, and with other variables playing in the equation — the largest is your quality setting — this number may vary greatly. We downloaded three similar length and resolution movies — some of the Star Wars movies, which clock in just over two hours each — to see how each of the options affects the file size. The Standard Quality Strikes Back Empire was 0.92GB for 2 hours, 7 minutes runtime, while A New Hope averages 1.4GB for 2 hours and 4 minutes. This is a modest leap compared to the Return of the Jedi on high quality, which needed 5.5GB for 2 hours and 14 minutes. For shows, a 39-minute episode of The Mandalorian on high quality requires 1.5GB, but only 270MB on standard and 424MB on average. Finally, at 3 hours, 1 minute runtime, The Avengers: End Game needs a huge 7.1GB. Using the above data, you can process an estimatehow much space you need to store everything you want. you can mix and match by adjusting the quality setting before starting the download. now would also be an excellent time forif you need a Wi-Fi connection to download content, an option those on limited data should certainly consider. Disney+ allows you to download only Wi-Fi by default. What is available? As explained above, all in the Disney+ catalog can be downloaded for offline consumption. Whether it's an entire season of Darkwing Duck or every single Marvel Cinematic Universe movie, if it's on Disney+, you can download it. Unlike some other services, Disney+ is rather loose for restrictions. For beginners, you can download a single title on up to 10 different devices at a time, and you can download any of them as often as you want. The only thing Disney asks is that you connect to Disney+ every 30 days. How do I eliminate titles? In the end, you want to make room for something new. If you want to delete a single title or deck all at once, Disney+ makes the task deliciously simple. Step 1: Delete a single title When you want to delete titles from your device, the process is much easier than downloading files. In fact, it will only take a couple of seconds to delete something from Disney+. First, find the content by going to the download section. You can access the download area by touching the second icon from the right on the app navigation bar. Find the movie you want to delete and click the smartphone icon on the right of its title. Select Remove Download, and the title will immediately escort you from your storage. If you are deleting some selected movies or programs, this is a simple way to do it. Step 2: Clear all titles You have a few options to remove titles from your Disney+ page after they have been downloaded. Within the Download section, you will notice a Edit button in the upper right corner of the screen. Select Edit and, quickly, several squares will startnext to each movie or TV title on the screen. You can click on these squares to select a specifier choose different content options at the same time. Click on as many squares as you want to delete. After making the selection, tap the trash icon to remove them permanently. In a few clicks, you can edit the library to appear as you want. If you prefer to delete all downloaded titles, click the Select All button to highlight each title. Then click the garbage icon. If you accidentally highlight all titles, but you want to turn them off, just tap the Select All button once again. If you're looking for a faster way to delete mass options, Disney+ has a feature you can use. Tap the profile icon at the bottom right of the screen. Then browse Settings and select Delete all downloads. This option trash all titles with just one click, which quickly free space for all new titles you want to download next.
